

Beta 2 Release Notes

Date: November 1, 2007

Status: Final

Author: David Mann

CKS:EWE Team (for this release):

Mark Arend
Loke Kit Kai
Brendon Schwartz
Lawrence Liu
David Mann

Introduction

This is the second beta release of the Community Kit for SharePoint – Enhanced Wiki Edition. This document provides some basic information on the release and how to report bugs.

For the most up-to-date information about CKS:EWE, please visit <http://www.codeplex.com/cks>.

Functionality in this Release

There are three major pieces of functionality in the release:

1. **Wiki Discussions** – The Wiki Discussions feature extends MOSS 2007 Wiki sites to include integrated discussions. For each Wiki Page, a SharePoint Discussion Board page allows you to maintain a threaded discussion on the topic. These are fully integrated so that the discussion thread simply appears as another facet of the wiki page; deleting and renaming are automatically synchronized
2. **Frequently Asked Questions/Table of Contents** – through the introduction of some custom markup, this allows for the wiki-based construction of a Table of Contents containing links to tagged content on the current page.
3. **Enhanced Wiki Markup** – through the use of custom tokens, textual formatting (bold, italics, underline, etc) can be introduced using standard wiki markup.

Installation Notes

In order to install this Beta, you must:

Community Kit for SharePoint®

Enhanced Wiki Edition

1. Run ***deploy.cmd*** from the "Release" folder. The command line is: ***deploy.com [url]***. For example: ***deploy.cmd http://myWSSServer***
2. Navigate to your SharePoint site and create a new Wiki Site
3. Enable the **Wiki Discussion List** Feature on the new site
4. Create a new ***CKS:Enhanced Wiki Page Library*** list on this new site
5. Create a new Page.

Q: What is the airspeed velocity of an unladen swallow?

Q: Another Question?

Q: Another Question #2?

Q: Another Question #3?

Q: Another Question #4?

This is an introductory paragraph talking about my content.
Lorem ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse id diam. Donec tempor porttitor metus. Morbi vitae tellus. Curabitur elit elit, venenatis vel, laoreet ut, dapibus nec, quam. Fusce erat. Suspendisse lacus mauris, rhoncus non, elementum nec, mollis vitae, mi. Duis tortor augue, tincidunt euismod, euismod at, gravida ac, nisl. Cras non lectus. In leo diam, sagittis et, viverra eu, euismod luctus, risus. Phasellus in dolor. Maecenas iaculis posuere ligula. Sed blandit leo quis risus. Nulla sed dui. Nunc sed diam. Praesent tempus. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus.

Q: What is the airspeed velocity of an unladen swallow?

A: This is the answer to question #1. African or European? Lorem ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse id diam. Donec tempor porttitor metus. Morbi vitae tellus. Curabitur elit elit, venenatis vel, laoreet ut, dapibus nec, quam. Fusce erat. Suspendisse lacus mauris, rhoncus non, elementum nec, mollis vitae, mi. Duis tortor augue, tincidunt euismod, euismod at, gravida ac, nisl. Cras non lectus. In leo diam, sagittis et, viverra eu, euismod luctus, risus. Phasellus in dolor. Maecenas iaculis posuere ligula. Sed blandit leo quis risus. Nulla sed dui. Nunc sed diam. Praesent tempus. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus.

Enhanced Wiki Edition

Custom Markup used to produce the above:

A screenshot of a SharePoint Wiki page editor. At the top, there is a "Name" field containing "page2". Below it is a "Toggle Markup List" button. The main area is titled "Wiki Content" and contains a rich text editor toolbar. The content of the page is displayed in a code view, showing custom markup for a Table of Contents (TOC) and a FAQ section. The TOC section starts with `{{TOC}}` followed by a paragraph. The FAQ section uses `[{_Q_ : **What is the airspeed velocity of an unladen swallow?**) _A_ : ##This is the answer to question #1. African or European?]` for the first entry, and similar markup for two other questions. The text within the markup is Lorem Ipsum placeholder text. The page has a vertical scrollbar on the right side.

(Notice the FAQ/TOC markup as well as the text-formatting markup. While the Rich Text Editor bar is still visible and functional, it was not used in this sample.)

Known Bugs

There are certainly more but at this point, here's what we know about:

1. The default **Wiki Pages** library created as part of the Wiki Site does not yet support any custom markup. It does support Discussions.
2. The "Home" page functionality does not currently work in this release. The *AllItems* view is shown as the home page for the Wiki Library
3. When creating a new Wiki page from the *AllItems* view, you are returned to *AllItems* after the page is created instead of being taken to the newly created page.

Testing and Reporting

Report all bugs at <http://www.codeplex.com/CKS/WorkItem/List.aspx> and please make sure to preface each Issue with **EWE:** so we can find them more easily.

Please note that bugs or requests for help reported via any mechanism other than the CodePlex Issues List (<http://www.codeplex.com/CKS/WorkItem/List.aspx>) **will not be answered.**

Joining the Team

We have a lot of things planned for future versions of EWE. If you would like to join the team, please contact David Mann via the CodePlex "Contact" feature:

<https://www.codeplex.com/UserAccount/ContactUser.aspx?ContactUser=dmann>
