

Visual Basic Lesson Plan

The Visual Basic Lesson Plan1

The Visual Basic Lesson plan will begin with the beginning user to code their own back up for the need of their own business.

1. The beginning student will need to begin at Visual Studio for Visual Basic. The windows Form will be the design pick for this backup plan needed for their business.
2. The Visual Basic Code will be
'my.computer.filesystem.copydirectory(source, destination)'
3. The Windows FORM will allow a button on the FORM for the user to use for the 'Backup'. This is the word event the user will choose to mean something to them.
4. The Word Selection will be the name of the textbox for easy remembering later. The example will be
TheSourceDirectoryTextBox1 or
TheDestinationDirectoryTextBox1.
