

## Installation Instructions for Outlook 2008 Display International Times

Installation of the Outlook2007DIT add-in can be accomplished by:

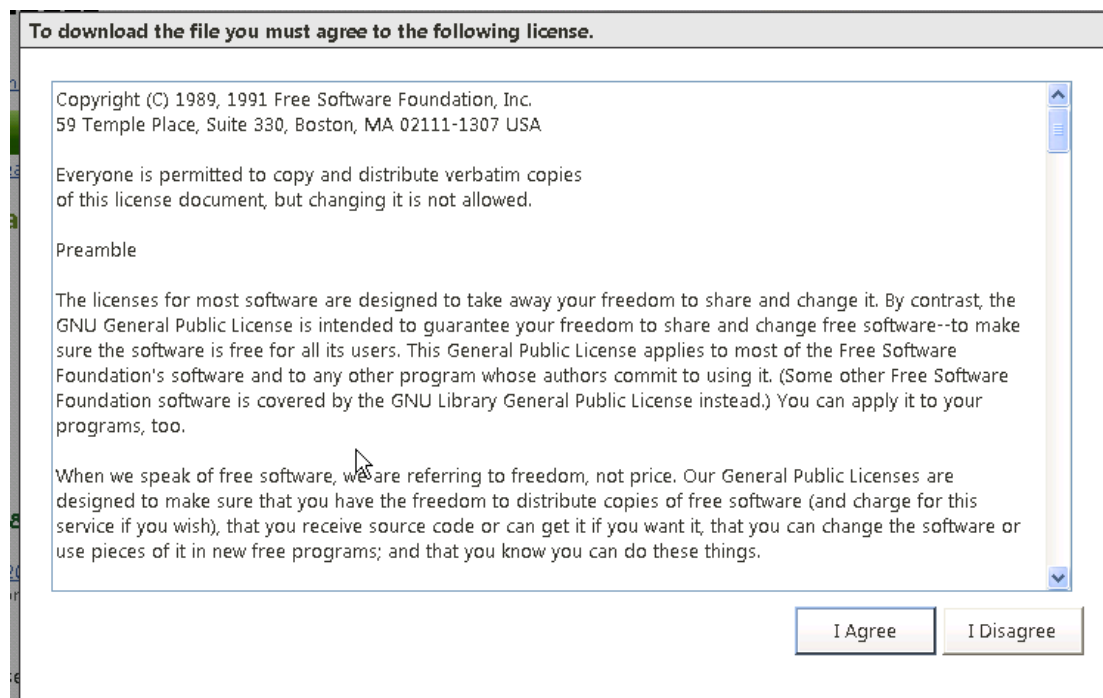

1. Download the release and save it to your hard drive
2. Run the downloaded release extracting the files to a temporary location
3. Run the setup program
4. Follow the prompts to install the pre-requisites and the add-in

### Pre-requisites

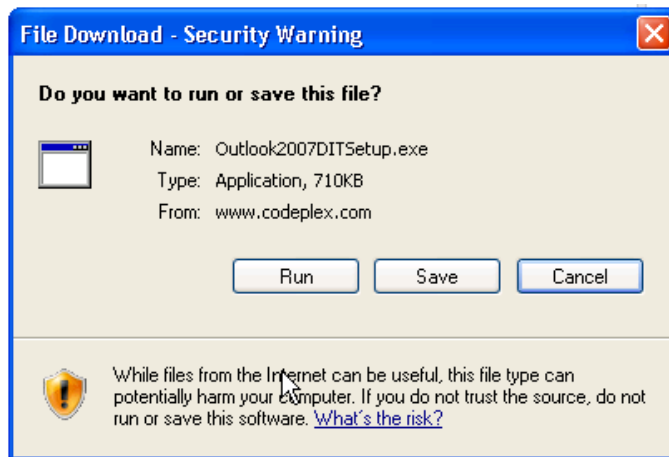

.NET 3.5

Office 2008 Primary Interop Assemblies

- 1) Select the release to install from the releases section of codeplex and agree to the license agreement.

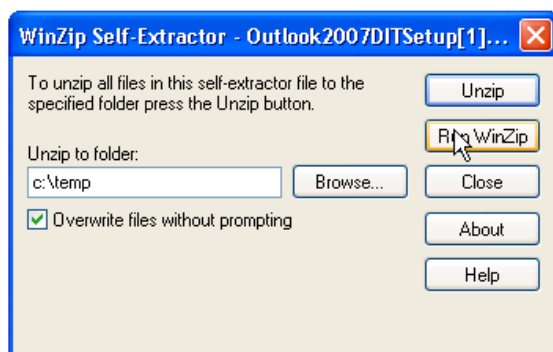

2) Save the release file to a temporary location

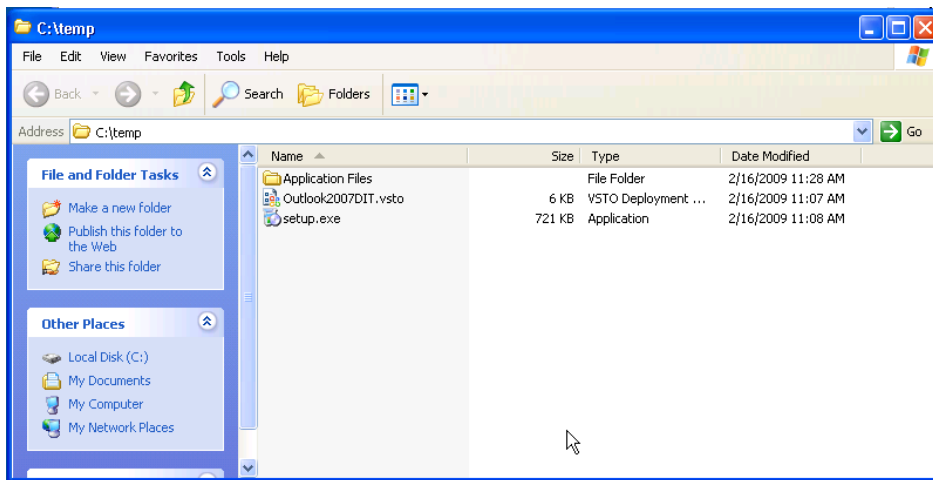

3) Follow the on screen dialog boxes to install the add-in

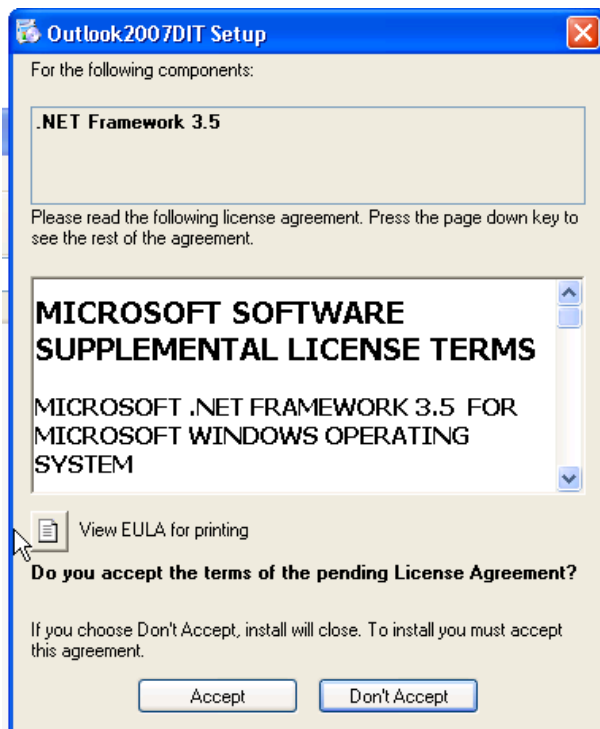

4) The setup application will extract the setup files to a temporary location.

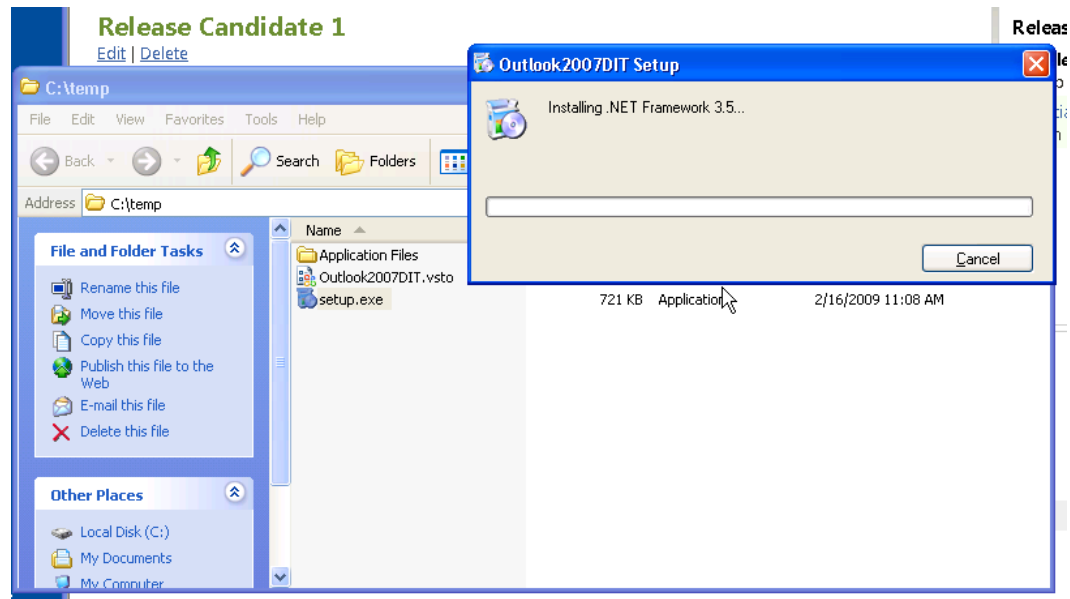

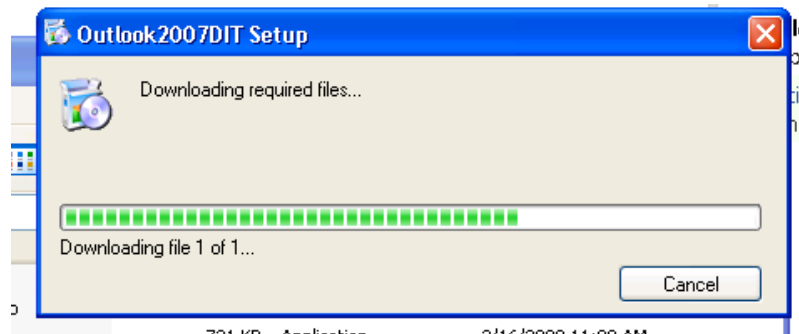

- 5) Launch the setup.exe application from the temporary directory where you unzipped the files.

- 6) Accept the installation of .NET framework 3.5 if necessary this process has several dialogs and may take more than a few minutes.

7) Select install and the add-in will install.
