

Subject: ReusableLibrary Demo DoS Attack (127.0.0.1)

This message indicates that the ReusableLibrary Demo application has detected denial-of-service attack. The matching condition was **10** errors during **30 minutes**. The following hosts **127.0.0.1** have been blocked with http forbidden response for **2 hours 15 minutes** until 2010/9/15 10:37 PM UTC.

Please report this detection to network admin for further actions.

A denial-of-service attack (DoS attack) is an attempt to make a computer resource unavailable to its intended users. Although the means to carry out, motives for, and targets of a DoS attack may vary, it generally consists of the concerted efforts of a person or people to prevent an site or service from functioning efficiently or at all, temporarily or indefinitely.
