

Replayer

Replayer is a free media player for use during rehearsals with playback music. It's main feature is fast navigation to predefined cue points in the playback media.

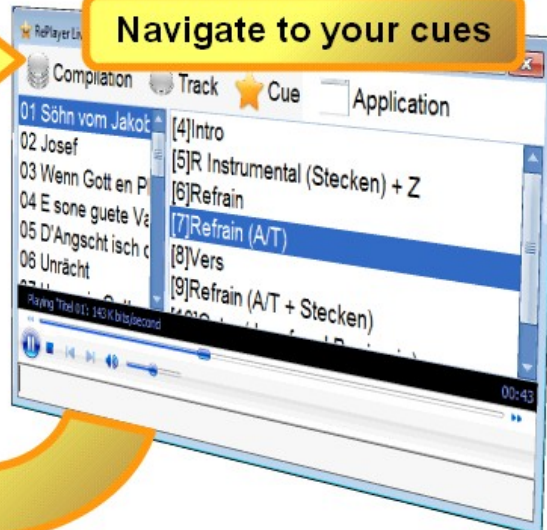

Getting started...

First, you create a compilation of tracks and cues once, using a wizard. Then, using *Replayer* and your laptop computer, you can rehearse any portion of your set with ease.

Use keyboard as remote control

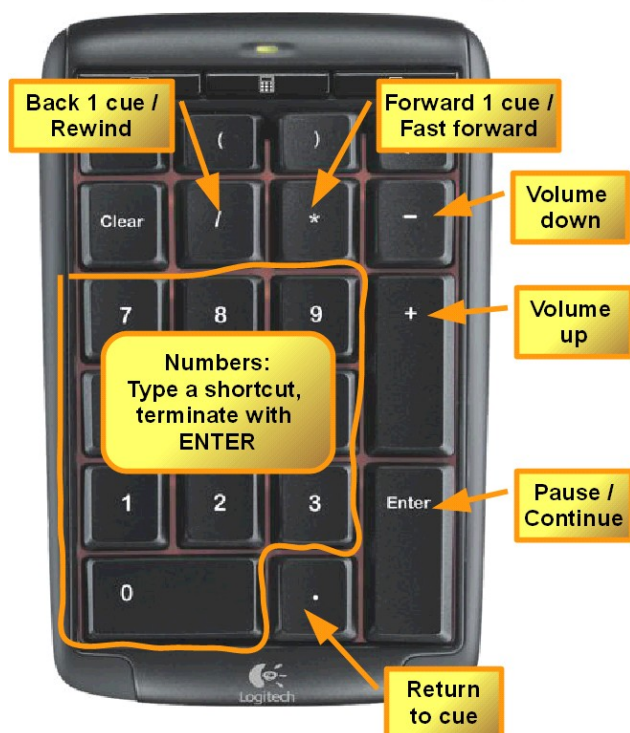

Navigate to your cues

Rehearse fast

Use the navigation features on the numeric keypad.
